Statement of Reasons for Allowance

1. Claims 10-18 are allowed. The following is an Examiner's statement of reasons for allowance: Applicants' argument that the reaction of Bowen (WO 95/29166 A1) could proceed through an intermediate with two attached -C(O)-Cl radicals and with no free hydroxyl group on pyrimidine is plausible. This proposed mechanism would not involve any free 4-chloro-6-hydroxypyrimidine, as presently claimed. While there is no evidence for this mechanism, neither is there any evidence for the Examiner's proposed mechanism involving sequential reactions, beyond the argument of stoichiometry. Applicants' proposed mechanism would also accommodate the requirement of the stoichiometry needed by Bowen (WO 95/29166 A1). Thus, the inherent presence of 4-chloro-6-hydroxypyrimidine in the teachings of Bowen (WO 95/29166 A1) is not at the level of certainty required by the case law. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
2. Information regarding the status of an application should be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public

PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at (866) 217-9197 (toll-free).
